

GOAD (Game of Active Directory)

🔥 cyberforge.blog/writeups/GOAD

These writeups, in this category, concern GOAD, an attack environment made by Orange Cyberdefense

Here is the associated github: <https://github.com/Orange-Cyberdefense/GOAD/>

The goal? Having an AD environment with vulnerabilities to test and exploit them.

The writeups in this category will be organized in "paths". Each path exploiting a new different flaw, or another way to exploit it

Here is an inventory of articles for GOAD:

Index

Article	Description	Link
Installation	• Installation of GOAD	• Installation
Enumeration	• SMB enumeration • RPC enumeration • Nmap scans	• Enumeration

Article	Description	Link
P1 - 1st path	- Initial access with password in description - Exploitation of "WriteDACL" on a GPO - Antivirus bypass - Use of a Havoc C2 server - Inter-domain privilege escalation with Golden Ticket	Part 1 Part 2 - Havoc Final Part
