mayfly

GOAD-Light

This is a light version of goad without the essos domain. This lab was build for computer with less performance (min ~20GB).

Missing scenarios:

- cross forest exploitation (no more external forest)

- mssql trusted link
- some old computer vulnerabilities (zero logon, petitpotam unauthent,...)
- ESC4, ESC2/3

Servers

This lab is actually composed of five virtual machines:

domain : sevenkingdoms.local

kingslanding : DC01 running on Windows Server 2019 (with windefender enabled by default)

domain : north.sevenkingdoms.local

- **winterfell** : DC02 running on Windows Server 2019 (with windefender enabled by default)
- **castelblack** : SRV02 running on Windows Server 2019 (with windefender **disabled** by default)

Users/Groups and associated vulnerabilities/scenarios

You can find a lot of the available scenarios on

NORTH.SEVENKINGDOMS.LOCAL

- STARKS: RDP on WINTERFELL AND CASTELBLACK
 - arya.stark: Execute as user on mssql
 - eddard.stark: DOMAIN ADMIN NORTH/ (bot 5min) LLMRN request to do NTLM relay with responder
 - catelyn.stark:
 - robb.stark: bot (3min) RESPONDER LLMR
 - sansa.stark:
 - brandon.stark: ASREP_ROASTING
 - rickon.stark:
 - theon.greyjoy:
 - jon.snow: mssql admin / KERBEROASTING / group cross domain / mssql trusted link
 - hodor: PASSWORD SPRAY (user=password)
- NIGHT WATCH: RDP on CASTELBLACK
 - samwell.tarly: Password in ldap description / mssql execute as login GPO abuse (Edit Settings on "STARKWALLPAPER" GPO)
 - jon.snow: (see starks)
 - jeor.mormont: (see mormont)

- MORMONT: RDP on CASTELBLACK
jeor.mormont: ACL writedacl-writeowner on group Night Watch
- AcrossTheSea : cross forest group

SEVENKINGDOMS.LOCAL

- LANISTERS
 - tywin.lannister: ACL forcechange-password on jaime.lannister
 - jaime.lannister: ACL genericwrite-on-user joffrey.baratheon
 - tyron.lannister: ACL self-self-membership-on-group Small Council
 - cersei.lannister: DOMAIN ADMIN SEVENKINGDOMS
- BARATHEON: RDP on KINGSLANDING
 - robert.baratheon: DOMAIN ADMIN SEVENKINGDOMS
 - joffrey.baratheon: ACL Write DACL on tyron.lannister
 - renly.baratheon:
 - stannis.baratheon: ACL genericall-on-computer kingslanding / ACL writeproperty-self-membership Domain Admins
- SMALL COUNCIL : ACL add Member to group dragon stone / RDP on KINGSLANDING
 - petyr.baelish: ACL writeproperty-on-group Domain Admins
 - lord.varys: ACL genericall-on-group Domain Admins / Acrossthenarrossea
 - maester.pycelle: ACL write owner on group Domain Admins
- DRAGONSTONE : ACL Write Owner on KINGSGUARD
- KINGSGUARD : ACL generic all on user stannis.baratheon
- AccorsTheNarrowSea: cross forest group
